16K	100K+	$1.4B	10M+
Contracts Processed Daily	System Units Supported	Contracts Managed	Transactions Handled

Core Competencies

AI-Driven Solutions
AI-powered contract summarization and matching with Grok 3, processing 1-8k contracts daily with advanced NLP.

Web & Mobile
Intuitive Flutter-based web/mobile interfaces, including ContractMatch deployed on Cloudflare Pages.

Power Platform
Custom Power Apps, Power BI dashboards, and Power Automate solutions for streamlined workflows.

Cloud & DevOps
Scalable Kubernetes/Docker infrastructure with CI/CD pipelines and comprehensive Prometheus/Grafana monitoring.

Database & Search
SQL Server, PostgreSQL/pgvector, and Dataverse for advanced data management and vector search capabilities.

System Architecture
Microservice-based C2 systems scaling to 100,000+ units with VMF and M-Code GPS integration.

Key Differentiators

AI Innovation
ContractMatch processes 16k contracts daily with advanced AI matching algorithms

Enterprise Scale
Systems handle 10M+ subscribers and millions of daily transactions

Defense Expertise
C2 systems for 100,000+ units with full ATO compliance

Power Platform
Streamlined $1.4B in contracts for 50+ users

Open Source
Prepdir on PyPI for AI-powered code review

Leadership
Mentored 12+ leads to top-tier promotions

Past Performance & Key Projects

Samscrape (2024-Present)
Advanced Python pipeline leveraging Grok 3 AI, processing 1-8k contracts daily with Flutter UI and Kubernetes deployment.
Tech: Python, Grok 3, Flutter, Kubernetes

Air Force CMS, GEBC (2022-Present)
Comprehensive Power Platform system managing $1.4B in contracts, supporting 50 users with advanced analytics and automation.
Tech: Power Apps, Power BI, Power Automate

JBC-P, SAIC (2018-2022)
Led enterprise C2 system architecture for 100,000+ units with ATO compliance, mentoring 12 technical leads to senior positions.
Tech: Microservices, VMF, M-Code GPS
